

Kentucky Drive-thru testing

Free drive-thru testing is currently offered in Franklin County and Kenton County.

To see if you qualify to register for a test and for more information visit www.thelittleclinic.com/drivethru-testing or call 1-888-852-2567 (select option 1, then option 3).

The goal of the partnership with the Commonwealth of Kentucky and Kroger is to conduct 20,000 tests over the next five weeks. The state, Kroger and other partners expect to be able to handle about 250 vehicles per day per site at all locations.

Those eligible for the test include health care workers, first responders, those 65 and older, those with chronic health conditions and those with COVID-19 symptoms.

- First, people seeking a test will use a virtual screening tool based on U.S. Centers for Disease Control and Prevention (CDC) guidelines to see if they are eligible.
- Next, they will select a testing location and appointment time that works for them.
- Then, registrants will receive an email confirmation with pre-appointment paperwork to complete.
- When a person arrives for their test, they should have their photo ID ready and should leave their window rolled up for check-in, until a health care practitioner comes to the car for the test.
- Test results are expected within approximately 48-hours.

Other project partners include: Kroger Health, UPS, Gravity Diagnostics, Kentucky Division of Emergency Management, Kentucky Department for Public Health, Kentucky State Police, Kentucky Transportation Cabinet, Kentucky National Guard and Franklin and Kenton counties.
